## Digital Enterprise Maturity Model

A Broad Enterprise Capability Assessment for Focused Recommendations and Results

#### The Challenge

The modern digital enterprise must deliver complex services at a pace that can be difficult to manage. The continual need to expand technical knowledge and the ability to support workloads across multiple clouds only magnifies the challenge.

How does IT begin a comprehensive effort to upskill and align with what the business truly needs?

#### The Solution

Understanding where you are is the first step in discovering where you need to be. By identifying highly performing areas that align with digital transformation goals and objectives, along with under-performing service areas, the investment of time and money in transformation projects can be aligned with genuine business needs.

Target High-Value IT Capabilities That Can Immediately Improve Service Delivery

Align Digital Transformation Investment With Identified Business Needs And Gaps

Measure Business Value For Capability Adoption

Impact And Improve It Service Delivery Across Multiple Domains

### Multi-Discipline, Comprehensive, Business-Aligned

Detailed Assessment Methodology Detailed maturity worksheets with questions, answers, scoring, notes, and evidence for all 51 capabilities in scope for the assessment across the organization.
